Education

Institute of Technology, Nirma University *B.Tech in AI & Machine Learning* **CGPA: 8.65/10** *Jul 2024 – Jul 2028*
Class XII (Science): 96.7% — 99.1 Percentile — Rank 160 (Gujarat) *2024*

Skills Summary

Languages	Python, C++, C, JavaScript, TypeScript
ML, AI & GenAI	PyTorch, TensorFlow, Scikit-Learn, XGBoost, SHAP, Optuna, OpenCV, FAISS, SentenceTransformers, LangChain, LangSmith, ONNX, OpenVINO, Gemini Live, OpenAI, Anthropic Claude, Groq, Pipecat-AI
Web & Backend	FastAPI, Express.js, Next.js, React, Flask, Supabase, Git, Electron
Cloud & DB	MySQL, PostgreSQL, AWS RDS, Azure, Vercel

Experience

AI/ML Engineer Intern — Velino AI (Remote) *Jun 2026 – Present*
◦ Built two production AI SaaS products: Salesnix AI — B2B voice ordering agent (Gemini Live, Pipecat-AI WebRTC, Silero VAD, WhatsApp Cloud API, 5 live tool calls, Razorpay); Sociafy — multi-model content pipeline (GPT-5, Claude agentic loops, Modal GPU TTS/video, OAuth 2.0 for 5 platforms, Stripe/Razorpay billing).

AI/ML Intern — Elevate Labs (Remote) *May 2025 – Jun 2025*
◦ Top-performing intern; built end-to-end NLP and Computer Vision pipelines using PyTorch, TensorFlow, and Scikit-learn for model training, feature engineering, and evaluation.

Full Stack Developer Intern — MZHUB Faithtech (Remote) *Dec 2025*
◦ Developed and deployed production-grade Next.js platform on Microsoft Azure App Service with responsive frontend and automated email notification pipeline.

Research Experience

Robotic Arm Fault Detection using CatBoost Classifier (IEEE Sensors Letters, 2026)  
◦ Proposed CatBoost-based model achieving **97.20% accuracy** and **0.9718 F1-score** on CASPER dataset; outperformed SVM, Logistic Regression, Naive Bayes, and QDA baselines.

Projects

Spectra Scan — Automated Paint Defect Detection System   —  
◦ Built a fully offline LangChain + LangGraph agentic RAG troubleshooting assistant (Ollama Phi-3, ChromaDB, BGE embeddings, 345 industrial error codes) with multi-turn conversation support; developed the complete Electron 39 + React 18 desktop application with 13 pages including a 3D door panel model viewer (React Three Fiber), real-time servo position charts (Recharts), and role-based access control (Admin/Operator/Viewer) — part of a 2m × 2m × 2m CNC gantry-based automated paint defect inspection system.

Lumin.AI — AI-Powered Solar Plant Risk Monitoring Platform  
◦ Built a 7-stage XGBoost ML pipeline with 183 rolling-window features, SMOTE balancing, and Optuna hyperparameter tuning, using SHAP for per-prediction explainability; selected Groq Llama 3.3 70B via a 3-model LLM ablation study; implemented an 8-step agentic maintenance ticket workflow, 4-layer hallucination guardrails, LangSmith observability tracing, and a real-time Next.js 15 dashboard backed by AWS RDS.

SENTINEL — Privacy-Preserving Edge AI Mental Wellbeing System  
◦ Benchmarked 10 Ollama models on Raspberry Pi 5 and selected phi3:mini for fully offline operation (2.0GB, zero cloud telemetry); built a 5-step pipeline — VADER sentiment, ChromaDB RAG retrieval, EmotionEngine with a 10-turn sliding window, streaming LLM inference, and FER-based facial emotion recognition (7 emotions) — all served in real-time via Flask and SSE.

Open Source

◦ **DevTrack — Founder & Maintainer:** 175+ stars, 430+ forks, **272 contributors**, 1,500+ commits; 27,985 clones in 14 days; personally reviewed **1000+ merged PRs** 

◦ **PyTorch — contributor:** Merged 3 PRs via pytorchmergebot (lint fixes in `torch.package`, `__all__` for `torch.amp`, 2026 Docathon); 6+ open PRs under review.

Positions of Responsibility

Vice Chair — ACM Student Chapter, Nirma University *Nov 2025 – Present*
◦ Led technical workshops, hackathons, and AI/ML seminars; grew chapter engagement to 500+ students.

Artificial Intelligence Engineer — Team CON-SOL-E *Jan 2026 – Present*
◦ Built RAG agents (LangChain, FAISS, SentenceTransformers) and WebAR visualization pipelines for industrial monitoring.

Achievements

◦ **Winner – Aubergine Track, HackAMined National Hackathon (2026)** — Secured **1st place** in Aubergine track and ranked **Top 5 Overall (Finalist)** among **400+ teams** and **2300+ participants**.

◦ **National Rank 4 – Mitsubishi Electric Cup (6th Edition) (2026)** — national-level competition focused on Factory Automation.

◦ **Reliance Foundation Scholar (2025)** — Awarded Reliance Foundation Undergraduate Scholarship for academic excellence.

◦ **Winner – CodeAdda Premier League (Codeforces) (Apr 2025)** — Secured **1st place** in university-wide competitive programming contest among **200+ participants**.

Certifications

◦ **Supervised Machine Learning** — DeepLearning.AI (Stanford) · Coursera — Score: 99.83% — [Certificate](#) 

◦ **PyTorch for Deep Learning Bootcamp** — Udemy — Score: 95.4% — [Certificate](#)
