

Priyanshu Doshi

☎ +91 95499 26195 ✉ doshipriyanshu3@gmail.com 📁 portfolio in iampriyanshudoshi 🐙 Priyanshu-byte-coder 🏆 LeetCode

Education

Institute of Technology, Nirma University *B.Tech in AI & Machine Learning* CGPA: 8.65/10 Jul 2024 – Jul 2028
Class XII (Science): 96.7% — 99.1 Percentile — Rank 160 (Gujarat) 2024

Skills Summary

Languages Python, C++, C, TypeScript, JavaScript, SQL
ML, AI & GenAI PyTorch, TensorFlow, Scikit-Learn, XGBoost, CatBoost, SHAP, Optuna, OpenCV, DINOv2, ONNX, OpenVINO, FAISS, LangChain, LangGraph, LangSmith, Groq, Gemini Live, Pipecat-AI
Web & Backend FastAPI, Express.js, Next.js, React, Flask, Electron, Supabase, Drizzle, WebSockets
Cloud, DB & Tools PostgreSQL, MySQL, AWS RDS, Azure, Vercel, Docker, Git, GitHub Actions, Playwright

Open Source

- 🔗 **GuitarPedal** — *Patch merged by Linus Torvalds*, creator of Linux and Git: “Looks sane, merged.” Fixed a race condition in real-time C firmware that silently dropped parameter updates while an effect was bypassed. 🔗
- 🔗 **DevTrack** — *Founder & Maintainer: 211 stars, 440+ forks, 280+ contributors*; personally reviewed and merged **1,050+ pull requests** while keeping CI green — Playwright E2E + visual-regression suites, Codecov, Sentry, Docker. 🔗
- 🔗 **contextrot** — *Creator & Maintainer*: Python CLI measuring where coding agents degrade. **13,000+ PyPI downloads, 41 stars**; zero-config, 100% local. 🔗
- 🔗 **PyTorch** — **3 PRs merged** into core; **TensorFlow** — **1 PR merged** into core.

Experience

- AI/ML Engineer Intern — Velino AI (Remote)** Jun 2026 – Present
- Shipped **5 products** across voice AI and web: a self-hosted voice pipeline (Silero VAD → faster-whisper → Groq LLM → TTS) with a FastAPI streaming-WebSocket server and GPU concurrency benchmarking; two **Gemini Live + Pipecat** speech-to-speech agents with **10 n8n tool calls**; a Next.js/TypeScript dashboard; and a brand-monitoring feature with **5 OAuth 2.0 integrations**.
- Full Stack Developer Intern — MZHUB Faithtech (Remote)** Dec 2025
- Developed and deployed a production-grade Next.js platform on **Microsoft Azure App Service** with responsive frontend and automated email notification pipeline. Live at mzhub.in 🔗.
- AI/ML Intern — Elevate Labs (Remote)** May 2025 – Jun 2025
- Top-performing intern**; built end-to-end NLP and Computer Vision pipelines in PyTorch, TensorFlow and Scikit-learn.

Research Experience

- Robotic Arm Fault Detection using CatBoost Classifier (IEEE Sensors Letters, 2026)** 🔗🌐
- Proposed CatBoost-based model achieving **97.20% accuracy** and **0.9718 F1-score** on the CASPER dataset; outperformed SVM, Logistic Regression, Naive Bayes and QDA baselines. **100+ full-text views** on IEEE Xplore.

Projects

- Spectra Scan — Automated Paint Defect Detection System (National Rank 4)** 🔗🌐 — 🔗🌐
- Industrial QC platform for a **2m × 2m × 2m CNC gantry**: DINOv2 ViT-B/14 encoder + CNN decoder compiled to **OpenVINO** for **sub-500ms** on-device inference across 3 defect classes. Built a fully offline LangChain + LangGraph agentic RAG assistant (Ollama Phi-3, ChromaDB, **345 error codes**) and the complete **Electron 39 + React 18** desktop app (13 pages, RBAC) over a FastAPI backend driving a Mitsubishi PLC. **100% local**.
- Lumin.AI — Solar Plant Risk Monitoring Platform (Hackathon Winner)** 🔗🌐
- Built a **7-stage XGBoost** pipeline with **183 rolling-window features**, SMOTE balancing and **Optuna tuning (40 trials)**, validated by walk-forward cross-validation, with SHAP per-prediction explainability. Selected Groq Llama 3.3 70B via a **3-model ablation (135 evaluations)** — 91.7% at **1.0s avg vs 21.2s**; added an 8-step agentic ticket workflow, **4-layer hallucination guardrails** and LangSmith tracing behind a Next.js 15 dashboard on AWS RDS.
- SENTINEL — Privacy-Preserving Edge AI Wellbeing System (17 stars)** 🔗🌐
- Benchmarked **10 Ollama models** on a Raspberry Pi 5 (50 inferences, 5-metric scoring) and selected phi3:mini for fully offline operation — **2.0GB, 3.68s avg, 8.56/10 quality**, zero cloud telemetry. Built a 5-step pipeline: VADER sentiment → ChromaDB RAG → EmotionEngine (10-turn sliding window) → streaming LLM inference → FER facial emotion recognition (7 emotions), served via Flask and SSE.

Achievements

- Winner – Aubergine Track, HackAMined National Hackathon (2026)** — Secured **1st place** in Aubergine track and ranked **Top 5 Overall (Finalist)** among **400+ teams and 2300+ participants**.
- National Rank 4 – Mitsubishi Electric Cup (6th Edition) (2026)** — national-level competition focused on Factory Automation.
- Winner – CodeAdda Premier League (Codeforces) (Apr 2025)** — Secured **1st place** in university-wide competitive programming contest among **200+ participants**; **200+ problems solved** on LeetCode.
- Reliance Foundation Scholar (2025)** — Awarded Reliance Foundation Undergraduate Scholarship for academic excellence.

Positions of Responsibility & Certifications

- Vice Chair** — ACM Student Chapter, Nirma University (Nov 2025 – Present): led technical workshops, hackathons and AI/ML seminars; grew chapter engagement to **500+ students**.
- Artificial Intelligence Engineer** — Team CON-SOL-E (Jan 2026 – Mar 2026): built RAG agents (LangChain, FAISS, Sentence-Transformers) and WebAR visualization pipelines for industrial monitoring.
- Certifications**: Supervised Machine Learning — DeepLearning.AI (Stanford) · Coursera, **99.83%** 🔗 — PyTorch for Deep Learning Bootcamp — Udemy, **95.4%** 🔗
